**Hardware:
Career Paths**

Tuesday 2/3

Debrief

Main goal of this meeting:

- **Discuss the general career paths related to hardware**

Preface

- We at SIT want you to have a successful career in STEM
- Therefore, this week and the next, we will discuss jobs to consider based on if you prefer hard/software

Majors

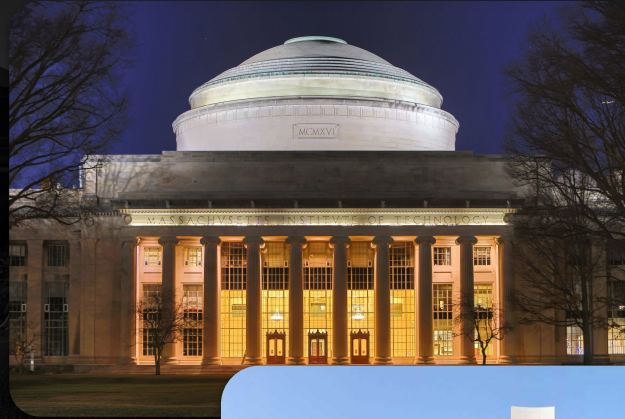

- Engineering comes to mind first and foremost and there are different types of engineering based on individual strengths
 - Computer
 - Electrical
 - Mechanical

Schools

- Here are schools to aim for:
 - MIT
 - Caltech
 - Georgia Tech
 - UC Berkeley
 - Stanford
- Where you go to school is not the end all be all! You can still go to SDSU or even Community College and still land a great job

The Jobs

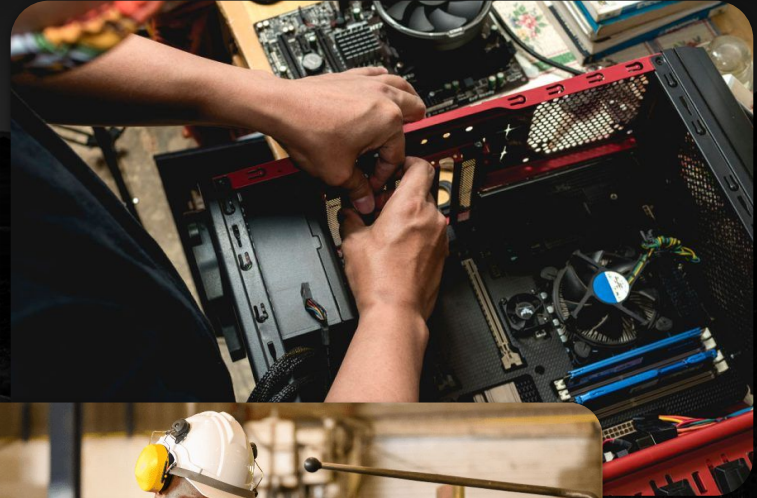

- With one of these degrees, you'd be able to work with the following:
 - Power/Energy
 - Communications
 - Electronics
 - Aerospace
 - Among many others!

The Jobs

- There are other hardware-based jobs that don't necessarily need any form of engineering degree
 - However, they may be lower paying
- These jobs include the following:
 - Repairs/Refurbishing
 - Assembly
 - Field Service
 - Installations
 - Tech Support

Next Meeting

2/10

Ground plan:

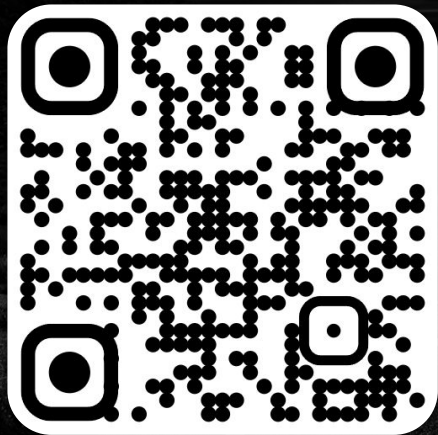

- Discuss career pathways which deal in software
