

WELCOME TO
SIT5

**Software:
Career Paths**

Tuesday 2/10

Debrief

Main goal of this meeting:

- **Discuss the general career paths related to software**

Preface

- We at SIT want you to have a successful career in STEM
- Therefore, this week and the next, we will discuss jobs to consider based on if you prefer hard/software

Majors

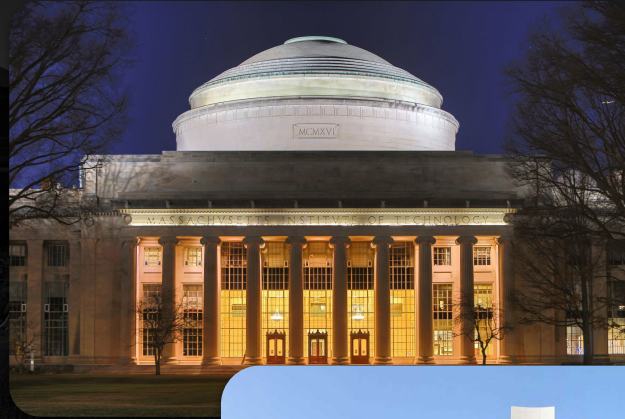

- Unlike hardware-based jobs, there's a decent variety of software-based majors
 - Computer Science
 - Software Engineering
 - Information Tech.
 - Cybersecurity
 - Software Development
 - Data Science
 - Management Info Sys.

Schools

- Here are schools to aim for:
 - MIT
 - Caltech
 - Carnegie Mellon
 - Georgia Tech
 - UC San Diego
- Where you go to school is not the end all be all! You can still go to SDSU or even Community College and still land a great job

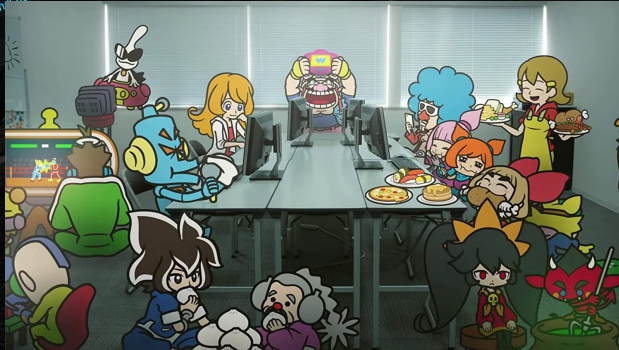

The Jobs

```

index.html
34 const events = {
35   'dragenter',
36   'dragleave',
37   'dragover', // to allow drop
38   'drop'
39 };
40 events.forEach(e => {
41   fileDropZone.addEventListener(e, (e) => {
42     fileDropZone.preventDefault();
43     if (e.type === 'dragenter') {
44       fileDropZone.classList.add('solid-border');
45     }
46     if (e.type === 'dragleave') {
47       fileDropZone.classList.remove('solid-border');
48     }
49     if (e.type === 'drop') {
50       if (e.dataTransfer.files) {
51         handleFiles(e.dataTransfer.files);
52         .then(values => values.map(tag => {
53           tag.setAttribute('class', 'border rounded tag-animate');
54           fileDropZone.appendChild(tag);
55         }));
56       }
57     }
58   });
59 });
60

```

- With one of these degrees, you'd be able to work with the following:
 - Any major tech company
 - Video Games
 - Military Defense
 - Websites
 - Managerial Systems
 - Statistics/Analytics
 - Cybersecurity

The Jobs

- Unlike hardware-based jobs, software-based jobs almost always require a degree
 - This can be due to these jobs being white-collar in nature whereas the former can even be blue-collar
- But again, getting that degree shouldn't be too hard. There's many avenues!

Next Meeting 2/17

Ground plan:

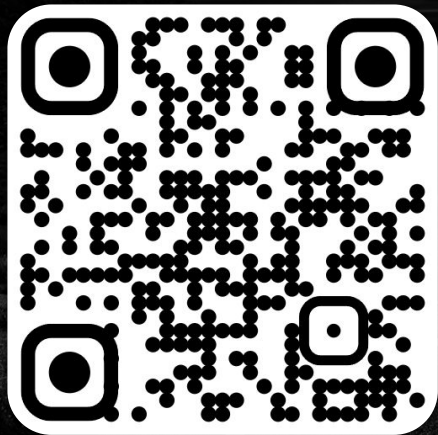

- TBD
