

WELCOME TO  
**SITE**

**Computers:  
They're everywhere**

**Tuesday 9/16**

# Debrief

Main goal of this meeting:

- Look at where computers integrate themselves in our everyday lives

# What Defines a Computer?

- **Most people know your conventional Personal Computers but there's more computers out there!**
  - **Smart Devices (iPads, Smartphones)**
  - **Cars**
  - **Furniture**
  - **Electric Rides (Scooters, Bikes)**
  - **Arcades**
  - **And more!**

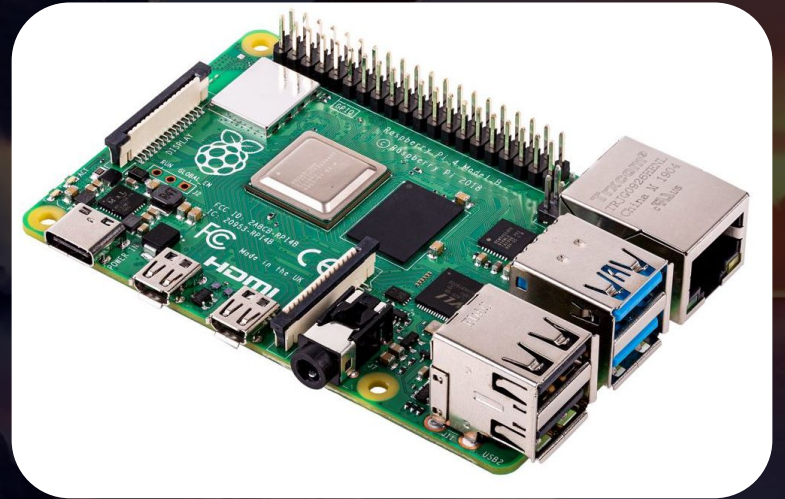

# Stereotypical Computers

- You can find many generic computers basically everywhere.
- These places include:
  - Offices
  - Schools
  - Homes
- These computers come in all shapes and sizes, big and small.

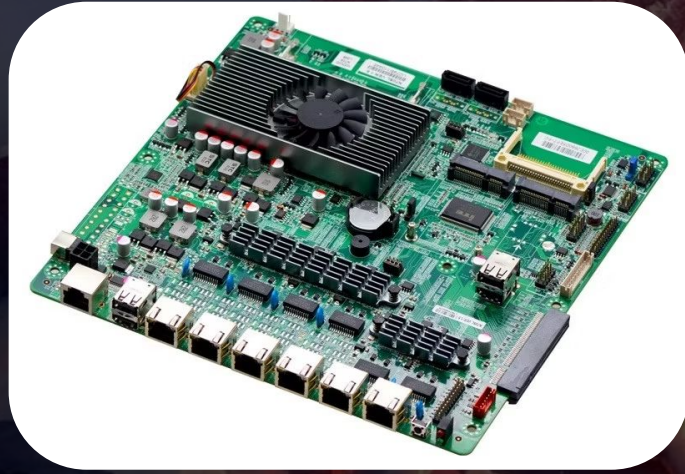

- **SBC (single board computers) are categorized as computers that can function with nothing but a power cord.**
- **Some examples are:**
  - **Raspberry Pis**
  - **Mobile Phones**
- **These kinds of computers are generally not as powerful as full sized ones**

- Other places you can find computers are inside of:
  - Cars (Bottom)
  - Servers
  - Routers (Top)
  - Fridges
  - Digital advertising screens
  - Alarm clocks

As well as anything with the prefix "Smart"

**Question...**

**What else do you think has a computer inside  
of it?**

**Ask, and we shall see!**

# Current Mission

- Our current mission, the digital bathroom / hall pass is currently complete! It is currently functioning and installed in this class for light testing
- Although it is deployed, many bugs and suggestions need to be addressed. Feel free to visit this QR code to test it out!

**Next Meeting**  
**9/30**

**Ground plan:**

- **To Be Determined**

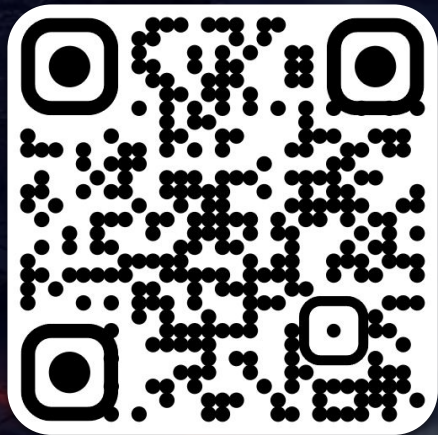

**We will be participating in the food fair!**  
**See you there!**
