Overview

Graphics Processing Unit (GPU): Overview

A screenshot of the Microsoft Word application window titled "Document1 - Microsoft Word". The window displays a list of bullet points describing the functions of a Graphics Processing Unit (GPU). The interface includes a menu bar (File, Edit, View, Insert, Format, Tools, Table, Window, Help), a toolbar with various icons, and a status bar at the bottom showing "Page 1", "Sec 1", "1/1", "At 1\"", "Ln 1", "Col 1", and "REC TRK EXT".

- The “eyes” of the computer
- The component which renders what you see on your monitor and what the CPU cooked up
- Features similar components to a CPU (cache and cores)
- Rasterization = Raw Performance
- Video RAM (VRAM) is where the GPU stores data
- Power is scaled by rasterization and VRAM
